Disclaimer:

Color buttons:

- Ooredoo, Telecolumbus, Helios and Dawn boxes do **not** make use of live television in the background of the store. Which means: there is no scaling feature (blue button) available.

- Ooredoo is the only box without color buttons.

Standard button behaviour:

The standard button behaviour is the action taken after pressing any of the specified buttons shown in the base actions below. This means that the actions are bound to that specific button, but can be overwritten by the application it self, if so desired.

*note:

Some tables are left empty for adding more information as this document progresses.
